(54) PVA BASED FILM AND OPTICAL FILM

(57)Abstract:

PURPOSE: To provide a PVA (polyvinylalcohol) based film having an excellent optical homogeneity, a PVA based polarizing film and a PVA based phase difference film.

CONSTITUTION: The PVA based film having a $\cdot 1.0 \times 10^{-3}$ average double refractive index (Δn) and a $\cdot 0.13 \times 10^{-3}$ double refractive index variation (R_n), preferably has a 20 to 100 μ m average thickness (t) and a $\cdot 3\%$ thickness variation (R_t). The polarizing film using the PVA based film has a $\cdot 0.5\%$ monochromatic transmittance variation (R_y) and a $\cdot 2.5$ dichroism ratio variation (ΔR_d). The phase difference film using the PVA based film has a $\cdot 2\%$ phase difference variation (R_e).

LEGAL STATUS

[Date of request for examination] 29.06.1999

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
